Dataset: Online Retail II **Period:** Dec 2009 – Dec 2011 **Customers:** 5,878
Transactions: 779,425

Model: CatBoost Classifier **ROC-AUC:** 0.90 **F1 Score:** 0.80

Churn Prediction

Predict churn probability for a customer using CatBoost model (ROC-AUC: 0.90)

How to use: Enter a customer's behavioral metrics below. The model will predict their churn probability and explain which factors are driving the prediction.
